

KEMA's Utility of the Future Leadership Series

4th Annual Forum: Shaping the Future

Preliminary Forum Program

June 6–8, 2011
Four Seasons Hotel
Denver, Colorado

Experience
you can trust.

Focused insight for leaders, by leaders.

Flexibility is critical for the utility of the future

So how do utility executives build for success when the game is changing, the economics are uncertain, customers are apprehensive, regulations are tightening, and technology is rapidly advancing?

The utility industry is juggling the uncertainty and risk, which are driving changes in every segment of the business. Innovative leaders and entrepreneurs are challenging old business models and the traditional roles of utilities, customers, and vendors.

When: June 6–8, 2011

Where: Four Seasons, Denver, Colorado

KEMA's annual Utility of the Future Leadership Forum brings together industry leaders; technology innovators; and regulatory, policy, and financial experts. Together, we explore the possibilities and promises of new business models, innovative technologies, and regulatory landscapes. The event provides a view from the top and opportunities for leaders to connect with each other as they seek to build for the future.

The 2011 Utility of the Future Leadership Forum features one and one-half days of discussions about industry game changers, new business models, and customer engagement. The forum also provides ample opportunities for networking and small group meetings.

Venue
